

From a few sensors to the whole state — groundwater in **metres**.

Real **APWRIMS** readings fused with **NASA** satellite signals: depth for **639 mandals**, gap-filled where sensors go quiet, **forecast a month ahead**, and quality-checked — every number with an honest confidence band.

Andhra Pradesh · groundwater depth

670 mandal boundaries · modelled estimate, metres below ground

639

Mandals, in metres

Depth for every mandal with sensor history.

±1.3 m

Validated

R² 0.90 on months the model never saw.

Verify

Catches bad sensors

Flags readings that diverge from the model.
